EXPERIENCE

NXP Semiconductors — Full-Stack GenAI Engineer

Remote · Apr 2025 – Jun 2026

- Built and owned document upload and file-management workflows reused across 20+ customized LibreChat LLM agents on the company's internal enterprise GenAI platform
- Developed the document ingestion layer — duplicate detection, retry and progress states, upload payload handling, REST API integration, file history/listing, and file removal — supporting knowledge-base prompting and RAG-adjacent document workflows
- Delivered custom platform features spanning RAG, plugins, agents, and authentication, and carried them through multiple LibreChat version upgrades without breaking document ingestion, agent management, or access control
- Piloted LLM platform adoption for Microsoft Teams, integrating Teams SDK, SSO, Microsoft Entra ID, and OAuth
- Resolved image-rendering and UI regressions introduced across LibreChat versions
- Acted as technical contact and frontend owner for cross-team rollout (Accenture adoption) and supported company-wide adoption, including Promptathon operations

TLDR Media — Software Engineer (Contract)

Remote · Apr 2024 – May 2024

- Built Next.js/Supabase endpoints for email-subscription management and shipped 4 PostHog A/B tests, fixing interface-rendering issues across the core product

Confluent — Software Engineer

Mountain View, CA · Aug 2022 – Aug 2023

- Shipped 3 features for Stream Sharing and supported its product launch
- Expanded automated system-test coverage across 30+ microservices with FastAPI-based tests and Kubernetes debugging
- Modularized test infrastructure and documented the process for adding new endpoints
- Led the metrics migration from Datadog to New Relic

Stream Engine

Lead Software Engineer

Irvine, CA · Jan 2022 – Aug 2022

Software Engineer

Irvine, CA · Oct 2020 – Dec 2021

- Led a team of 6 engineers building an analytics platform on Next.js and Google Cloud Functions
- Built analytics functions in Pandas and scikit-learn, delivering 30+ metrics for 4 clients
- Reconciled client requirements with the product roadmap, enabling 2 partnerships

Earlier Experience

- **Confluent** — SWE Intern (May 2021 – Aug 2021): Built MVP for Stream Sharing using React, Redux, Django, AWS, and DynamoDB
- **MetLife** — SWE Intern (May 2020 – Aug 2020): Built .NET, React Native, Angular.js, and Electron components across internal systems and ServiceNow workflows
- **Tencent America** — Business Analytics Intern (Jun 2019 – Aug 2019): Researched competitor and audience trends; presented product recommendations to the Board of Directors
- **Flipword** — SWE Intern (Jan 2019 – May 2019): Built visualization features for Chrome extension in d3.js for language-learning mastery

EDUCATION

New York University — B.S., Computer Science, minor in Game Engineering (Aug 2018 – May 2022)

Coursework: Human-Computer Interaction, AI · Head of Logistics, HackNYU

SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML/CSS

Frontend: React, Next.js, Redux, Tailwind CSS, Chakra UI, React Native, Angular

Backend & APIs: Node.js, Express, Django, FastAPI, PostgreSQL, Supabase, REST API design & integration

Cloud, DevOps & Auth: AWS (CodeCommit, CodePipeline / CI/CD), Docker, Kubernetes, Google Cloud Functions, Git, OAuth, SSO, MSAL, Microsoft Entra ID / Azure AD, Microsoft Teams SDK

Testing & Monitoring: Automated/integration testing, A/B testing (PostHog), production debugging, Datadog, New Relic

AI & GenAI: LibreChat, LLM gateways/agent auth, knowledge-base workflows, Codex/Claude for development tools

VOLUNTEERING

Major League Hacking — Developer Advocate (Jan 2019 – Present)

Represent 5+ sponsors and oversee teams of 10+ organizers at global hackathons with 1000+ participants; write technical content for sponsor promotion and hacker engagement.
